Indexes to Volume 22 (1990)

The subject index has been organized into seven topics for easy reference. When appropriate, papers have been listed under more than one heading.

Subject index

Semiconductor lasers
Frequency-tunable semiconductors lasers, 1
Mode-selection characteristics of the symmetrical three-section composite-cavity InGaAsP/InP semiconductor laser, 77
A novel structure of visible semiconductor lasers, 385
Simulations and experiments of mode-locking of semiconductor lasers: pulse evolution; frequency detuning, and bias dependence, 561

Lasers (other than semiconductor)
Laser oscillations on HgII transitions in a transverse HF discharge, 83
Simultaneous emission on 10P and 10R branch lines from a hybrid CO_2 laser, 89
Performance of a c.w. Rhodamine 6G dye laser passively mode-locked by a new styryl dye, 293
Competitive relaxation of the lumped-distributed feedback intensity in dye lasers, 443
Dye laser pulse shortening and stabilization by Q-switching, 375
Prismatic pulse compression: beam deviations and geometrical perturbations, 467

Special Issue on Solid State Lasers (see full index below).

Optical communication systems
Improved analysis of dispersion penalty in optical fibre systems, 23
Bit-error rate evaluation for non-linear propagation in optical fibres, 285
RACE project R1010 scenario for the implementation of coherent multi-channel systems in the subscriber area of the European IBC network, 535

Waveguides
Polarisation behaviour in lossy non-linear birefringent optical fibres, 37
Step discontinuities in dielectric waveguides (fibres), 65
All-optical waveguide switching, 95
Effective cut-offs for modes on helical fibres, 213
Mechanical and hydrogen characteristics of hermetically coated optical fibre, 227
Perturbation analysis of finitely clad optical waveguides and couplers, 239
Flouride fibres for optical transmission, 259
Investigation into the birefringence and mechanical stresses in bow-tie fibres, 279
Three dimensional step discontinuities in planar waveguides: angular-spectrum representation of guided wave-fields and generalized matrix-operator formalism, 319
All-optical fibre devices using polarization ellipse rotation, 343
Phase-space analysis of alternating $\Delta\beta$ couplers, 369
Silica waveguides on silicon and their application to integrated-optic components, 391
Multiport single-mode fibre splitters, 453
Spectrum control and shaping of optical pulses in optical fibre interferometers, 491
Influence of intrapulse Raman scattering on the modulational instability in optical fibres, 529
Discrete spectral index method for rib waveguide analysis, 555
All-optical waveguide switching, 95
Efficient non-linear optical fibres and their applications, 187

Non-linear optics
Stimulated Brillouin scattering of Gaussian beams, 33

All-optical waveguide switching, 95
Group velocity difference effect on incoherent sum-frequency generation spectrum, 123
Optical dispersive bistability in media with forced girotropy, 131
Chaos in phase-conjugate resonators as a multimodal mapping, 157
Intensity-dependent coupling strengths in multigrating phase-conjugation using photorefractive crystals, 167
Efficient non-linear optical fibres and their applications, 187
Organic second-order non-linear optical materials and devices, 297
Induced probe-beam modulation and resonatorless optical bistability in semiconductor (CdS_xSe_{1-x}) doped glass, 335
Two-photon absorption and resonant non-phase-matched second-harmonic generation in CdSe, 351
Non-linear refractive index of silicon and GaAs induced by free-carrier generation, 485
Transverse interactions in 2-D feedback non-linear optical systems, 501
Polarization behaviour in lossy non-linear birefringent optical fibres, 37
All-optical fibre devices using polarization ellipse rotation, 343
Influence of intrapulse Raman scattering on the modulational instability in optical fibres, 529

Classical optics
Holographic investigations on photoinduced changes in dichromated gelatin, 17
Two dimensional measurements of flow velocity in a microscopic region using two rotating gratings, 143
Optical power efficiency in coherent optical correlator systems, 179
Simultaneous diffraction of two finite waves at non-uniform dynamic volume reflection gratings, 433

Optoelectronic devices
Experimental investigation of the transverse electric field in charge-coupled devices, 55
High speed tunable thermic modulation of far infrared waves, 417
Optical isolators using Bi-substituted rare-earth iron garnet films, 517
All-optical fibre devices using polarization ellipse rotation, 343
Phase-space analysis of alternating $\Delta\beta$ couplers, 369
Silica waveguides on silicon and their application to integrated-optic components, 391
Multiport single-mode fibre splitters, 453

Short pulses and picosecond processes
Femtosecond soliton attractors in fibres, 175
Dye laser pulse shortening and stabilization by Q-switching, 375
Non-linear filtering of soliton pulses in dual-core fibres, 427
Prismatic pulse compression: beam deviations and geometrical perturbations, 467
Theory of a 'time telescope', 473
Simulations and experiments of mode-locking of semiconductor lasers: pulse evolution; frequency detuning, and bias dependence, 561
Performance of a c.w. Rhodamine 6G dye laser passively mode-locked by a new styryl dye, 293

Solid-State Lasers (special issue)
Ground-state depleted solid-state lasers: principles, characteristics and scaling, S1
Reflection losses of a multidisc diode-pumped Nd:YAG laser, S23
Diode-pumped moving-disc laser: a new configuration for high average power generation, S33
High-power solid-state lasers with unstable resonators, S39
A single axial mode YAG:Nd laser with electronic linewidth narrowing, S57
Non-linear population processes of Er^{3+} laser levels in chromium-doped garnet crystals, S61
Upconversion-pumped population kinetics for $^4I_{13/2}$ and $^4I_{11/2}$ laser states of Er^{3+} ion in several host crystals, S75
Spectroscopic and laser properties of Er^{3+}-doped monoclinic BaY_2F_8 single crystals, S95
Spectroscopic and laser properties of Cr^{3+}:Yb^{3+}:Er^{3+}: flouride phosphate glass, S107
Energy transfer from Cr^{3+} multisites to Tm^{3+} multisites in yttrium aluminium garnet, S123
Spectroscopic characteristics of YSGG:Cr, Ho, YSGG:Cr, Tm and TSGG:Cr, Tm, Ho, S133
Efficient room-temperature operation of Cr^{3+}-sensitized, flashlamp-pumped, 2 μm lasers, S141
Fluorescence dynamics in the codoped systems $YLiF_4$ (Er^{3+}, Tm^{3+}, Ho^{3+}) after 800 nm excitation, S153
Optical characteristics of tunable solid-state laser gain media, S167

The role of excited-state absorption in tunable solid-state lasers, S199
Excited-state absorption of Co^{2+} in MgF_2 and $KZnF_3$, S219
Spectroscopy of multisites Cr^{3+} and Nd^{3+} in yttrium aluminium garnet, S227
Multisites Cr^{3+} in GGG and GSGG garnets, S247
Flashlamp-pumped laser performance of $LiCaAlF_6:Cr^{3+}$, S259
GSAG and YSAG: a study on isomorphism and crystal growth, S269
Non-linear crystals for tunable coherent sources, S283

Charge Transport Nonlinearities (special issue)
Charge transport nonlinearities: an introduction, S1
Dynamics of photorefractive nonlinear two-beam coupling and feedback effects, S17
Non-equilibrium charge transfer and low-temperature photorefractive effects, S47
Quantum-well self-electro-optic effect devices, S61
Photogenerated charge transport and novel electro-optical effects in semiconductor superlattices for photonic devices, S99
Nonlinear optical properties of n–i–p–i and hetero n–i–p–i structures and their potential for application in photonics, S121
Optical and electronic properties of delta-doped doping superlattices, S141
Performance characteristics of hetero n–i–p–i structures S187
Optical, vibrational and structural properties of staggered alignment (type II) GaAs/AlAs and ternary alloy $Al_xGa_{1-x}As$/AlAs multiple quantum wells, S201
Optical properties of GaAs/AlAs type II quantum wells, S231
PbTe doping superlattices: properties of p–n–p and p–i–n–i–p structures, S243
Nonlinear optical and electro-optical properties of intrinsic Stark-effect superlattices, S261

Author index

Special issues:
(SSL) Solid State lasers;
(CTN) Charge transport non-linearities;
(OA) Optical amplifiers
